

<<Team ASK - Status Report Week 1>>

Project Summary

Creating a means to organize and track books for a personal library. With features to search and add books to user's library

Team Members – (Hours Worked on Project)

Kevin Andrade, Axel Fernandes-Spencer, Sebastian Oquendo – about 2.5 hours each, 7-8 hours total

Completed Tasks from Last Week – (Task Owner)

Brainstorm over project idea, languages, tech and features being included.
Project Proposal

<u>Planned Time</u>	<u>Actual Time</u>	<u>Remaining Hours in Budget</u>
4	7	

Planned Tasks for Next Week – (Task Owner)

- Use Case diagram
- Start wireframe
- Begin gantt chart

Project Risks – (High, Medium, Low)

Medium - Time allocation, with other responsibilities with other classes and work, we must organize and plan accordingly to allocate time for this project.

Overdue Tasks

None

Issues

- Deciding on topic of project.
- What platform will this application be used (mobile or desktop)
- Deciding on what features and components to include in the application.

Follow-up Actions – (Responsible Person)

- **Feature prioritization:** see what features are more important for the project and from there see what we can add or remove in the project and see what we have to focus on more. (group)
